

## Emergency system

### Emergency signal

for AS and A ranges

Thermoplastic (breakproof) high-gloss  
screw fixing only, without claws  
without frame

The emergency signal can e.g. be installed outside next to the WC door or landing door. A triggered emergency call is signalled visually by a red LED and acoustically by a buzzer, 90 dB(A). Both signals can, if required, be changed from continuous light/continuous tone to flashing light/pulsing tone. The floating relay contact (24 V / 2 A) can be used to trigger external signalling devices.

Material: thermoplastic

Colour: ivory

Manufacturer: JUNG

Ref.-no.: NRS AS 0834 RM
